01. Introduction

"WealthPark Logo Guideline" provides specifications and usage terms for the corporate logo (hereinafter referred to as the "logo").

The WealthPark logo is composed of a logotype and symbol, designed to visually represent our identity. By using the colors and styles specified in this guideline, you can promote brand image consistency and streamline communication. If you intend to use the WealthPark logo in a manner not explicitly outlined in this guideline, you must obtain prior approval from our company.

Please note that by using the WealthPark logo, you are considered to have agreed to abide by this guideline. Be sure to review and adhere to it before usage.

02. Design Concept

The WealthPark logo consists of a logotype, which is the word "WealthPark," and a symbol positioned to its left. These elements should generally be used together as a set of two. Using the logotype (text) alone is not permitted.

Meaning of the symbol

The WealthPark symbol consists of the letter "W," representing "Wealth," and a single line positioned below it. The "W" symbolizes abundance, while the line represents a "place." This "place" signifies a public space, akin to a park, where everyone can freely enter and gather. By combining these two motifs, it symbolizes a "WealthPark," where various forms of wealth converge and gather in a rich and diverse environment.

03. Variation

There are two types of logos Use them according to the occasion and space in which they will be used.

Main Version

The Main Version is a combination of the logotype and symbol. It is recommended that the Main Version be used whenever possible.

Inverse Version

Inverse Version is an inversion of light and dark. It is permitted to be used to ensure visibility when the background is too low in brightness to maintain contrast with the symbol.

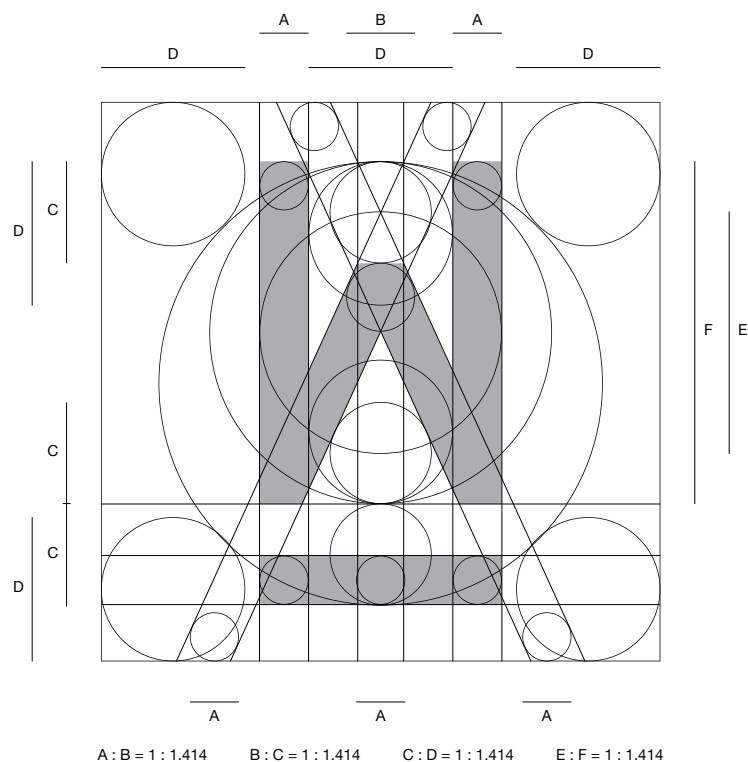

04. Grid Pattern

If the height of the symbol is x , the logo's white space consists of a grid with x as the smallest unit. There must always be a $2x$ margin between the symbol and logotype.

Grid Patterns

Grid Patterns (Indexing Diagram)

05. Logo Clear Space and Minimum Size

When placing the logo, we define a minimum margin between the logo and the surrounding graphic elements and the edge of the paper to prevent interference with other elements. The isolation rules are defined below. If the height of the symbol is set to 1, a margin of 0.5 is required around the logo. The logo can be enlarged or reduced as necessary. However, the aspect ratio must be maintained.

Isolation

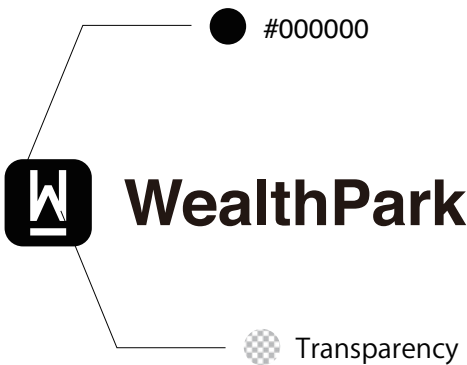

Minimum Size

06. Color Specifications

The logo must always be used and deployed in a uniform color. The following are the colors to be used for the logo.

Basic Display Colors

CMYK
C:0 M:0 Y:0 K:0

RGB
R:0 G:0 B:0

HTML
#000000
